SIP allows an investor to invest a certain pre-determined amount at a regular interval (monthly, quarterly, yearly etc.). SIP is a planned approach towards investments and helps to inculcate the habit of saving and building wealth for the future.

Buy and Surrender of SIP Process:

An investor can invest through SIP either by auto debit system provided against investor’s bank account or by providing monthly predetermined cheques or BEFTN instruction via Selling Agent(s) at a regular interval (monthly, quarterly, yearly etc.). Investor must have a BO Account. Investors will get SIP Units in their BO Accounts based on a discount (if any) from ongoing weekly “Investor’s Buy Price” of the Fund.

It is advisable to continue SIP investments with a long-term perspective without any compulsion. Investors can discontinue the plan at any time. If an investor wants to terminate the SIP before two (2) years, 1.0% discount from the “Investor’s sale/ Surrender Price” may be applicable on total accumulated invested amount on the date of cancellation of the SIP. After maturity of SIP, the investor can easily Surrender his/her total Units through the AMC or the Selling Agent(s).

Benefits may be offered to Investors as such:

SIP encourages a disciplined investment. While investing through SIP, investor commits himself/herself to save regularly. Different benefits may be offered such as follows:

- **Flexibility:** Investor can start SIP with a very small amount that is BDT 1,000/2,000/3,000/4,000/5,000 or multiple of BDT 500. One can also increase/ decrease the amount to be invested in regular fashion.
- **Flexible SIP Tenor:** The SIP will be offered for a minimum tenure of 2 years or a higher period for 3 years/ 5 years or as decided by the Asset Manager. If Surrendered, no fees/ charges may be charged on Surrender and may also be offered higher premium over the declared Surrender Price at that time.
- **No Minimum lot size:** There will be no minimum lot size under the SIP for general investors. Based on “Investor’s Buy Price” per Unit available for SIP investors, Units will be credited to investor’s BO Account. However, any fractional amount remaining will be converted when it sums up to one Unit. The fractional amount will be kept as liability of the Fund in a separate account head.
- **Purchase at Discount and Surrender at Premium:** SIP investor may buy Units at a discount from weekly Investor’s Buy Price offered to the general investors. In addition to that, SIP investor can Surrender at a premium over the Repurchase Price offered to general Unit holders at maturity or ending of the pre-agreed SIP tenure.
- **CIP option for the SIP investors:** SIP investors can choose either option of cash dividend or Cumulative Investment Plan (CIP) or mix of both. If an SIP investor chooses CIP (i.e. dividend reinvestment process) instead of cash dividend, he will also enjoy CIP Units at a discount of prevailing Investor’s Buy Price used for CIP conversion. CHAPTER 02

BACKGROUND

2.1 Preamble to Formation of CandleStone Rupali Bank Growth Fund

The journey of the mutual fund started in Europe in 17th century. The Dutch were the first to form a mutual fund to respond to the then prevailing financial crises in Europe. The goal was to minimize the risk with an opportunity to diversify.

A mutual fund is a professionally managed investment fund that pools money from many investors. These investors may be individual/retail or institutional in nature. The advantages of mutual funds include economies of scale, diversification, liquidity and professional management. Advantages have been higher than the disadvantages compared to direct investing in individual securities which is the key to the success of the mutual funds.

Since the inception, Rupali Bank Limited has been very actively participating in development of Bangladesh capital market as a part of the Government mandate. Rupali Bank realizes that mutual fund is the need of the hour to make our stock market more vibrant and efficient. Furthermore 'CandleStone Rupali Bank Growth Fund' will expand the Rupali Bank's product offerings to clients. In a drive to develop capital market and given the scarcity of mutual funds in the Bangladesh stock market, Rupali Bank Limited has decided to be the Sponsor of the 'CandleStone Rupali Bank Growth Fund'.

The key concern in mutual funds are reliability, efficiency, security; and to meet them Rupali Bank Limited has partnered with the Investment Corporation of Bangladesh as Trustee, CandleStone Investments Partner Limited as the Asset Manager and BRAC Bank Limited as Custodian to launch the 'CandleStone Rupali Bank Growth Fund'.

2.2 Necessity of Unit Fund in the Context of the Current State of Affairs of the Capital Market

In 1980, “First ICB Mutual Fund” emerged as the first ever mutual fund in Bangladesh. Over the years, about a hundred mutual funds were introduced in Bangladesh capital market. Primary structures of mutual funds are open-end funds and closed-end funds. Some of the close-end mutual funds were converted to open-end mutual funds and some are liquidated at maturity. Exchange Traded Fund (ETF) is in a process to be introduced in Bangladesh.

At the end of 2019, mutual fund assets worldwide were \$54.9 trillion, according to the Investment Company Institute. The countries with the largest mutual fund industries are:

1. United States: \$26.7 trillion
2. Australia: \$5.3 trillion
3. Ireland: \$3.4 trillion
4. Germany: \$2.5 trillion
5. Luxembourg: \$2.2 trillion
6. France: \$2.2 trillion
7. Japan: \$2.1 trillion
8. Canada: \$1.9 trillion
9. United Kingdom: \$1.9 trillion
10. China: \$1.4 trillion

In the United States, mutual funds play an important role in U.S. household finances. At the end of 2019, 23% of household financial assets were held in mutual funds. Their role in retirement savings was even more significant since mutual funds accounted for roughly half of the assets in individual retirement accounts and other similar retirement plans. In total, mutual funds are large investors in stocks and bonds.

In Bangladesh, the scenario is quite different. Compared to the developed countries, number of mutual funds and their asset under management (AUM) is insignificant in Bangladesh, though the scenario is changing gradually. As of now, there are only 37 close-end mutual funds and 58 open-end mutual funds. Still there are plenty of scope for more mutual funds and expansion of the industry. All over the world, mutual funds are often classified by their principal investments as money market funds, bond or fixed income funds, stock or equity funds, hybrid funds, or other. Funds may also be categorized as index funds, which are passively managed funds that match the performance of an index, or actively managed funds. Bangladesh mutual fund industry is yet to tap those opportunities.

Investors of the developed countries have a taste for open-end mutual funds over close-end mutual funds. In the United States, closed-end funds remained more popular than open-end funds throughout the 1920s. In 1929, open-end funds accounted for only 5% of the industry's \$27 billion in total assets. Following a market crash in 1929, new regulations encouraged the development of open-end mutual funds.

Bangladesh capital market is also leaning towards the open-end mutual funds due to its many advantages. As the open-end funds are priced based on its NAV as opposed to its close-end counterpart (which is priced based on demand and supply), investors are favoring open-end mutual fund.

Rupali Bank limited as the Sponsor and CandleStone Investments Partner Limited as the Asset manager are launching the "CandleStone Rupali Bank Growth Fund" having an initial target size of BDT 100.00 Crore which will help to develop the mutual fund industry of Bangladesh.

CandleStone Rupali Bank Growth Fund will create an investment opportunity for the individual and institutional investors, help to bring market stabilization and contribute towards the Government endeavor to develop the capital market.

2.3 Advantages of Investing in CandleStone Rupali Bank Growth Fund

Generally, investment in mutual funds enjoys some additional advantages compared to investments made directly in other securities of the capital market. Investors of this mutual fund should be able to enjoy the following advantages:

- **Diversified portfolio minimized risk :** The Fund will invest in different securities among different asset classes, companies and sectors. Such diversification allows investors to reduce the risk of a particular stock or sector. Through investing in the Fund, single investor gets access to a broader spectrum of securities due to pooled investments managed by market professionals.
- **Low Cost :** By purchasing Units of the Fund, investor will get access to a diversified portfolio at lower cost. It is cost efficient to manage the pooled investment by a single team rather than managing smaller amounts separately.
- **Fair Pricing :** Since, the Fund will not be listed in Stock Exchange (DSE & CSE) like closed end mutual funds, it will not be mispriced based on asymmetry in demand and supply and turbulent market conditions. Units of the Fund will fix the purchase and surrender price of the fund every week which will be very close to the Net Asset Value (NAV) of the fund.
- **Professional Fund Management service :** Investment Management team of CandleStone long experience in fund management in Bangladesh. Investment management team of CandleStone will carefully select the securities. Research team of CandleStone is continuously conducting fundamental and technical analysis on securities and investment of the Fund will be made only based on the market research.
- **Tax Benefits on Investment :** Income will be tax free up to certain level, which is permitted as per Finance Act. Investment in the Fund would qualify for investment tax credit under section 44(2) of the Income Tax Ordinance 1984.
- **Enhanced liquidity :** Greater participation of mutual funds will add to enhance liquidity to the overall capital market and, since most mutual funds are long term investment vehicles, this will create price stability and better price discovery and reduce short term volatility in market.

- **Regulatory compliance :** Fund management of mutual funds are subject to strict regulations from BSEC and the Trustee. BSEC closely monitors the performance of the Fund. The laws governing mutual funds require exhaustive disclosure to the regulator and general public. This makes mutual funds one of the most transparent and accountable investment instruments in Bangladesh. Investor will always have access to up-to-date information of the investment made.
- **Greater Accountability :** Unlike closed-end fund, unit holders of open-end fund may surrender the units to the Asset Manager and get the proceeds at current NAV of the fund. If the performance of the Asset Manager is not satisfactory, unit holders will tend to withdraw fund. Therefore, there is more accountability on the Asset Manager to manage the fund properly and perform above the market.
- **IPO Quota :** In Bangladesh, mutual funds enjoy a 10% (ten percent) reserved quota for all Initial Public Offerings (IPOs). IPOs in Bangladesh have historically performed very well relative to the market index and generated higher return.

2.3.1 Tax Advantages

Generally, mutual funds enjoy some additional tax advantages. All incomes of mutual fund are tax exempted as per এসআরও নং ৩৩৩-আইন/আয়কর/২০১১.

CHAPTER 04

RISK FACTOR

Risk Factors of the Fund:

There is no assurance that the Fund will meet its investment objective; and investors may lose money by investing in the Fund. As with all mutual funds, an investment in the Fund is not insured or guaranteed by the Government of Bangladesh or any other Government agency. Investments of mutual fund are subject to various risks which may lead to significant decrease in the value of the portfolio. Hence, the investments of Unit holder are not guaranteed.

- **Market Volatility :** Bangladesh capital market is highly volatile. Common stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that overall stock prices may decline because stock markets tend to move in cycles, with periods of rising and falling prices. The value of a stock in which the Fund invests may decline due to general weakness in the stock market or because of factors that affect a particular company or industry.
- **Investment Strategy Risk :** Although the Asset Manager will apply its investment process and risk minimization techniques when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.
- **Concentration Risk :** Due to a limited number of listed securities, it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Asset Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns.
- **Interest Rate Risk :** The Net Asset Value (NAV) of the Fund, to the extent invested in debt and money market securities, will be affected by changes in the general level of interest rates. In addition, zero coupon securities do not provide periodic interest payments to the holder of the security; these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. Asset Manager may choose to invest in zero coupon securities that offer attractive yields.
- **Market risk :** Stock prices and mutual fund prices generally fluctuate because of the interplay of the various market forces that may affect a single issuer, industry or sector of the economy or may affect the market as a whole. The Fund may lose its value or experience a substantial loss in its investments due to such market volatility.
- **Liquidity Risk :** Market conditions and investment allocation may have impact on the ability to sell securities during periods of market volatility. The Fund may not be able to sell securities or instruments at the appropriate price and/or time.
- **Dividend Risk from Fund's Investment :** If the companies wherein the Fund will be investing fail to pay expected dividend, it may affect the overall return of the Fund.

- **Equity Risk :** The market price of shares varies all the time depending on demand and supply. The risk of loss may arise because of a drop in the market price of shares.
