EXECUTIVE SUMMARY

EBL Asset Management Limited (Asset Management Company) is launching its first open-ended mutual fund, namely EBL AML 1st Unit Fund with an initial fund size of BDT 300 million. EBL Asset Management Limited is both the sponsor and the asset manager of this fund, whereas ICB Capital Management Limited will act as the trustee and also undertake the custodian role of the fund. This is a 'continuous offer' fund by nature, which facilitates the investors to subscribe and redeem units at their will. The Fund is going to offer electronic (online) purchases and repurchases process considering the convenience of the investors.

EBL Asset Management Limited (EBLAML) is fully owned subsidiary of Eastern Bank Limited-one of the leading Private Commercial Bank of Bangladesh. EBLAML is committed to deliver strong investment results by harnessing long-term, value-investing opportunities on behalf of the Unitholders. Senior executives of the company have sufficient training, experience and commitment towards upholding Unitholders' interest under any circumstance. As a part of such commitment, EBLAML is sponsoring the EBL AML 1st Unit Fund to spread the economic benefit of Bangladesh capital market to wider population.

The objective of the EBL AML 1st Unit Fund is to achieve superior risk adjusted return by-(a) allocating assets optimally in contemporary macroeconomic and market condition; and (b) selecting securities based on their ability to generate earnings/ cash flow sustainably over long-term. The Fund will also offer tax benefits and access to IPO subscription to its Unitholders.

CHAPTER 2: BACKGROUND

2.1 PREAMBLE TO FORMATION OF EBL AML 1ST UNIT FUND

Mutual fund is the most popular investment vehicle in the world. An asset management company (AMC) pools funds from individual and institutional investors under a mutual fund structure and then invest in different securities with varying risk-return profiles like stocks, fixed income securities and money market instruments etc. through that pooled fund to generate sustainable wealth for investors/ fund subscribers. An open-end mutual fund issues a “Unit” against the money received from a fund-investor who is interested to invest in the underlying securities but does not have the time and resources to undertake investment research or due-diligence activities. The asset manager of the mutual fund, with adequate professional credential and experience, undertakes the necessary investment research and management role on behalf of the investor. At any point in time, a fund-investor can surrender his/her “Unit” to the asset manager to cash-out the investment balance.

Mutual funds are very efficient risk-taking vehicle in the sense that they provide sufficient diversification benefit to investors even with smaller investable fund which is not available otherwise. By investing in an open-end mutual fund, the investors gain access to a thoroughly researched and professionally managed capital market portfolio without doing the hard-work themselves.

EBL Asset Management Limited (fully owned subsidiary of Eastern Bank Limited), a new generation asset management company with strong credentials and track-record, is committed to deliver highest-quality investment management services to capital market investors in Bangladesh. This balanced, open-end mutual fund will strive continuously to find the best value investment opportunities in Bangladesh to drive long-term sustainable wealth for Unitholders.

EBL Asset Management Limited is the Sponsor and Asset Manager of the Fund and the other parties include ICB Capital Management Limited being the Trustee and the Custodian of the Fund.

2.2 Advantages of Investing in Mutual Fund

The mutual fund industry in Bangladesh is still at its early or emerging stage, offering room for greater growth and product innovation. In Bangladesh, initially the fund managers and investors exhibited their growing interest on closed-end mutual funds, the space for promoting open ended funds have also been created subsequently. Investing in mutual funds especially for retail investors is considered as an attractive proposition mainly due to:

Professional Investment Management: Funds are actively managed by experienced investment professionals who make informed investment decisions based on continuous research of the economy, market and companies with a view to limit downside risk and improve the upside potential.

Portfolio Diversification: Mutual funds enjoy risk diversification, a key to smart investing through diversification of the pooled investment which usually reduces the risk per adjusted return for the small and retail investors.

Economies of Scale: Mutual funds by pooling together a large portfolio can negotiate competitive commissions and fees, which results in lower costs to the investors.

Transparency of the fund: Mutual funds being highly regulated investment vehicles which are formed and operated adhering to the rules and regulations set by the Bangladesh Securities and Exchange Commission (BSEC) under the supervision of a Board of Trustees and have to disclose relevant information to the Trustee, BSEC, Custodian and the public as prescribed in the সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১.

Less Stress: Investment management often results in emotional stress for an investor who is not a professional in the field of asset management. Whereas, fund managers being specialists in the field can engage themselves in an organized and disciplined way of investment management. Investing in mutual fund eases a general investor by transferring the responsibility of managing investment to professional fund managers.

2.3 RATIONALE BEHIND THE PROPOSED MUTUAL FUND IN THE CONTEXT OF PRESENT MARKET SCENARIO

Macroeconomic Status and Outlook of Bangladesh

Bangladesh has announced as one of the next 11 Economies by renowned investment bank Goldman Sachs, Frontier 5 Economies by the J. P. Morgan, and PWC expected the county to become the 23rd largest economy in 2050. Bangladesh achieved lower-middle income country's status from the World Bank in July 2015. The economic transformation began with emerging from agriculture intensive economy to manufacturing followed by gradual shift towards the service sectors. Additionally, young people represents nearly half total population so the country yet to get full potential from the demographic dividend in coming years. Measures are taken to invest in education, healthcare sector and most importantly in developing infrastructure. Government is working on Fast Track Infrastructure Projects on priority basis and when the right infrastructure is in place, the country will see the robust growth in economy.

Source: Bangladesh Bureau of Statistics (BBS)

The economy of Bangladesh has been growing with an average of 6% to 7% growth rate since last decade. The size of economy is over US\$ 302.57 Billion (Bn) in Jun 2019 and World Bank expects the Real GDP growth will be around 7% in coming years. In the National Budget for the Fiscal Year 2019 GDP growth has been achieved 8.15% where FY18 GDP growth rate was 7.86%, and actual GDP growth rate was 7.20% in FY17 according to the Bangladesh Bureau of Statistics (BBS).

Bangladesh is gearing up its growth engine and has become eligible for graduation from LDC which is likely to be achieved in the year 2024 making Bangladesh attractive for investors as it has shown its strength in certain areas namely its size of GDP, exports, and population. Increasing purchase power and demographic dividend is likely to elevate consumerism which will raise investment and production. Public expenditure, private investment, and foreign direct investment will continue its ascent as many ongoing infrastructure projects and upcoming projects are on the pipeline to push the economy for escalated its growth rapidly.

Bangladesh has committed massive investment in several mega projects that are expected to be completed by different timeframes from 2019-2025. With completion of these projects Bangladesh will be well equipped to register double digit growth.

Savings and Investment:

Bangladesh's Gross Savings Rate was measured at 29.5% in Jun 2019, compared with 27.4 % in the previous year. Bangladesh Gross Savings Rate is updated yearly, available from Jun 2006 to Jun 2019, with an average rate of 29.1%. The data reached an all-time high of 30.8 % in Jun 2016 and a record low of 27.4 % in Jun 2018. The June 2019 data is provisional estimates only. Bangladesh's Nominal GDP reached 302.6 USD bn in Jun 2019. Its GDP deflator (implicit price deflator) increased 4.5% in Jun 2019. Bangladesh's GDP Per Capita reached 1,827.0 USD in Jun 2019. [Source: <https://www.ceicdata.com/en>]

This shows that people are saving more day by day and if this savings is turned into investments, the overall economy will grow multifold. In fiscal 2017-18, overall investment to gross domestic product ratio increased 31.23% according to the planning Ministry where Private Investment consists of 23.26% of the GDP, which was 30.51% of the previous year according to the available data from the Bangladesh Bureau of Statistics.

The Capital Market of Bangladesh:

Globally, the capital market has been one of the most significant factors of economic development. Bangladesh stock market has grown robustly in the last few years. The stock market posted strong returns since 2000 as the economy of Bangladesh kept growing at more than 6% p.a. with leading companies posting stronger earnings growth throughout the cycles. According To the record, even with a stock market crash in 2010-11, blue-chip stock composite outperformed other liquid asset-classes significantly since 2000. Strong corporate performance and a number of regulatory reforms implemented by the BSEC helped the country to grow the foreign portfolio investment (FPI) remarkably. Resultantly, weight of Bangladeshi stocks in the MSCI Frontier Market Index increased by more than 6-times since 2010-11.

Participation of local institutional investors in the capital market of Bangladesh is not up-to the mark in comparison to peer countries. Pension funds and life insurance companies are hardly participating in the capital market of the country whereas banks' capital market exposures are closer to their limits. Under such circumstances, retail investors are the ones that are more active but, unfortunately with limited skill and awareness necessary for investment success. Such market structure drives significant market inefficiencies and volatility. The concepts of professional investment management and investing in Mutual Funds are still in their early days in the country. Currently there are only 34 close end mutual funds and about 53 open end mutual funds in Bangladesh.

Mutual Funds will play a big role in institutionalizing the market-structure and distributing sweet-fruits of the capital market in Bangladesh. EBL AML 1st Unit Fund is inspired by and aims to fit well into such strategic outlook.

Opportunity in Capital Market and Mutual Fund:

Bangladesh stock market has grown robustly in the last few years. However, the market capitalization to GDP ratio stands 13.5 % of its Nominal GDP in Jun 2019 in Bangladesh. The capital market has significant growth prospect relative to many other regional markets, in terms of increasing market turnover, depth and both local and foreign institutionalization of the market. The regulation is being very favorable for developing capital market as well as for development of different asset classes like fixed income, public equities and private equities. In capital market, investors look for risk adjusted return from their investment from equities. Mutual funds became one of the mainstream investment instruments for investors in last few years since the funds provide opportunities to realize financial gain through professional fund managers. At present, the capital market of Bangladesh is quite undervalued and further possibility of downside is not being expected. So, this is the high time to invest in capital market through mutual funds. Also, after the new public issue rules, there are many IPOs in the pipeline and each mutual fund have Eligible Investors (EI) quota in IPOs. When the IPO goes public, mutual funds will gain as well regularly.

2.4 ADVANTAGES OF INVESTING IN EBL AML 1ST UNIT FUND

EBL AML 1st Unit Fund offers following value-propositions to the potential investors:

- I. EBL AML 1st Unit Fund is ambitious to be the highest integrity investment product available to the target investors by putting Unitholders' interest before any other consideration under all circumstances. Being strong finance background with long experience, all senior executives of EBL Asset Management Limited will be adhering best Code of Ethics and Standards of Professional Conduct in addition to the সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১ for protecting unitholders' interest.

- II. Diversification contributes to optimize risk-return balance for the investors as it helps them not to put all the eggs in the same basket. EBL AML 1ST Unit Fund will be offering a value-oriented portfolio, well-diversified into many sectors, companies and securities to generate respectable investment performance with high probability under different market scenario.
- III. EBL AML 1ST Unit Fund, through its diversified pool of investments, will provide small investors access to returns of the wider market, which may be very costly for retail investors to achieve individually.
- IV. EBL AML 1ST Unit Fund's performance will benefit from EBLAML's strong proprietary investment research capability. Senior management executives of the AMC are well-trained in investment management with proven investment research and advisory track-record in Bangladesh for last 10 years. High-quality macro/industry/company databases, financial/quantitative models and strong corporate access of the management team will generate unique perspective and insight for the Fund to deliver strong performance to its Unitholders.
- V. In Bangladesh, mutual funds enjoy a 10% (ten percent) reserved quota for all Initial Public Offerings (IPOs). IPOs in Bangladesh have historically posted much better time-weighted-returns to subscribers and therefore, Unitholders' access to the reserved IPO subscription quota through Mutual Fund investments offers value not available otherwise.
- VI. The investors will be able to save significantly in transaction costs as he/she will have access to a large number of securities by purchasing a single unit of the mutual fund.
- VII. Dividend income from the Fund will be tax-free for up to Taka 25,000 as permitted under the current Finance Act.
- VIII. Investment in the Fund will qualify for investment tax credit in a range of 10- 15% under section 44(2) of the Income Tax Ordinance 1984.
- IX. Management and operations of mutual funds are subject to strict regulations from the BSEC and the sponsor-appointed Trustee, both of whom closely monitor the performance of the fund. The laws governing mutual funds require exhaustive disclosure to the regulator and general public.
- X. EBL AML 1st Unit Fund will declare 70% of annual realized earnings as dividends and also offers the investors to choose between receiving cash dividends and cumulative investment plan (CIP) to compound investment balance by minimizing transaction costs. The latter allows the fund manager to reinvest the dividend in the prevailing investment opportunities.
- XI. Price of the Units of the fund won't be determined by demand and supply in the public market, rather by Net Asset Value (NAV). The AMC will be liable to repurchase the Units surrendered by the Unitholders on the basis of NAV which mitigates Unitholders' liquidation risk.

2.5 TAX ADVANTAGE OF INVESTING IN EBL AML 1ST UNIT FUND

- 2.5.1** Income from a mutual fund or a unit fund up to BDT 25,000.00 (Twenty Five Thousand Taka only) is exempted from tax as per clause 22A of 6th Schedule (Part A) under Income Tax Ordinance, 1984.
- 2.5.2** According to the Section 44(2) under Income Tax Ordinance, 1984, the amount of allowable investment is actual investment or 25% of total taxable income or BDT 1,50,00,000.00 (One crore & Fifty Lac Taka only), whichever is lower.

3.11 INVESTMENT MANAGEMENT

EBL Asset Management Limited shall conduct the day-to-day management of the Fund's portfolio as the Asset Manager subject to the provisions laid down in the বিধিমালা and trust deed or any general directions given by the Trustee and/or the Commission. However, EBL Asset Management Limited shall have discretionary authority over the Fund's portfolio about investment decisions. (Please look into Section 5.4.1 for details on Investment Management Process)

3.12 DIVIDEND POLICY

- i. The accounting year of the Fund shall be July 01 to June 30;
- ii. The Fund shall distribute minimum 70%, or as may be determined by the বিধিমালা from time to time, of the annual net income of the Fund as dividend at the end of each accounting period after making provision for bad and doubtful investments. The Fund shall create a dividend equalization reserve by appropriation from the income of the Scheme;
- iii. Before declaration of dividend, the Asset Management Company shall make a provision in consultation with the Auditors if market value of investments goes below the acquisition cost and the method of calculation of this provision will be incorporated in notes of accounts;
- iv. Surpluses arising simply from the valuation of investments shall not be available for dividend;
- v. Dividend warrants will be dispatched within 45 days from the declaration of such dividends and due reporting shall be done in accordance with the বিধিমালা;

3.13 WINDING UP POLICY

3.13.1 Procedure of Winding Up

- I. If the total number of outstanding unit certificates held by the unit holders after repurchase at any point of time falls below 25% of the actual certificate issued, the Fund will be subject to wound up.
- II. The Fund may be wound up on the happening of any event, which, in the opinion of the Trustee with approval from the Commission, requires the Scheme to be wound up.
- III. The Scheme may also be wound up if the Commission so directs in the interest of the unit holders.
- IV. Where a Scheme is to be wound up in pursuance to the above, the Trustee and the Asset Management Company shall give simultaneously separate notice of the circumstances leading to the winding up of the Scheme to the Commission and if winding up is permitted by the Commission, shall publish in two national daily newspapers including a Bangla newspaper having circulation all over Bangladesh.

3.13.2 Manner of Winding Up

- i. The Trustee shall call a meeting within 30 days from the notice date of the unit holders of a Scheme to consider and pass necessary resolutions by three-fourth majority of the unit holders present and voting at the meeting for authorizing the Trustee to take steps for winding up of the Scheme. If it fails to have three-fourth majority mandate, the Commission shall have the power to supersede the mandate if situation demands such.
- ii. The Trustee shall dispose off the assets of the Scheme of the Fund in the best interest of the unit holders;

Provided that the proceeds of sale made in pursuance of the Rules, shall in the first instance be utilized towards discharge of such liabilities as are properly due under the Scheme and after making appropriate provision for meeting the expenses connected with such winding up, the balance shall be paid to the unit holders in proportion to their respective interest in the assets of the Scheme as on the date when the decision for winding up was taken.

- iii. Within thirty days from the completion of the winding up, the Trustee shall forward to the Commission and the unit holders a report on the winding up containing particulars, such as circumstances leading to the winding up, the steps taken for disposal of assets of the Scheme before winding up, expenses of the Fund for winding up, net assets available for distribution to the unit holders and a certificate from the auditors of the Scheme of the Fund.

3.13.3 Effect of Winding Up

On and from the date of the notice of the winding up of the Fund, the Trustee or the Asset Management Company, as the case may be, shall

1. Cease to carry on any business activities of the open-end fund;
2. Cease to create and cancel unit of the open-end fund;
3. Cease to issue and redeem units of the open-end fund.

CHAPTER 4: RISK FACTORS

Investing in the EBL AML 1st Unit Fund (hereinafter the Fund) involves certain risks that investors should carefully consider before investing in the Fund. Investment in the capital market and in the Fund bears certain risks that are normally associated with making investments in securities including loss of principal amount invested. There can be no assurance that the Fund will achieve its investment objectives. The Fund value can be volatile and no assurance can be given that investors will receive the amount originally invested. When investing in the Fund, investors should carefully consider the risk factors outlined below, which are not necessarily exhaustive or mutually exclusive:

1. General: Mutual fund's investment objective is not guaranteed. Unit-holders may incur absolute and relative losses, including loss of principal, when investing in the Fund. Mutual funds and securities investments are exposed to market risks and no government agency or the sponsor/AMC is offering a performance guarantee, hereby. Investors should study this Offer Document carefully before investing. Due to the fluctuation of the price/ value/ interest rates of the securities in which Scheme invests, the value of investment in the Scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.

2. External Risk Factor: Mutual fund's performance is dependent on external factor such as macroeconomic, political, social and environmental factor. Political and social instability may have an adverse effect on the value of the Fund's assets. Natural calamities may impact the performance of the Fund.

3. Market Risk: The capital market of Bangladesh is highly volatile and mutual fund prices and prices of securities may deviate significantly from their respective fundamental value estimates, at times for prolonged period. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying Net Asset Values.

4. Concentration Risk: Constructing well-diversified portfolio may be difficult due to the absence of wide array of investable financial assets class in Bangladesh as well as limited number of investable stocks in DSE and CSE. Very narrow and highly thinly traded bond market of the country has not been supporting the Asset Manager to design and implement optimum asset allocation decisions from time to time. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns and increases the concentration risk.

5. Dividend Risk: Despite careful stock selection for Fund's investment, if the companies fail to provide the expected dividend or fail to disburse dividends declared in a timely manner that will impact the income and the overall return of the Fund.

6. Underlying Liquidity Risk: For investing in Pre-Public Offer Placement securities i.e. in the unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund, and may lead to the Fund incurring losses till the security is finally sold. While securities listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold.

7. Investment Strategy Risk: Since the Fund will be an actively managed investment portfolio; the Fund performance will remain subject to the investment management strategy risk. The AMC will undertake rigorous investment research and risk management exercise at all the time; however, there can be no guarantee that such process and techniques will produce the desired outcome. Due to the long-term fundamental analysis driven management style of the AMC, the Fund may drag performance relative to the market index/ benchmark in too weak or strong market conditions when market volatility is high.

8. Credit Risk: Since the Fund will seek to invest as per the সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১, in both equity and fixed income securities; the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.

9. Interest Rate Risk: The Net Asset Value (NAV) of the Fund, to the extent invested in fixed income securities (debt and money Market securities), will directly be affected by changes in the general level of interest rates. However, value of equity securities is inversely and non-linearly related to general level of interest rates. As allocation for equity securities will generally be higher than that for fixed income securities, NAV of the Fund is expected to increase from a fall in interest rates and vice versa. Additionally, zero coupon securities do not provide periodic interest payments to their investors making them more risky from interest rate risk perspective. However, the AMC may choose to invest in zero coupon securities that offer attractive yields commensurable for inherent higher level of interest rate risk.

10. Issuer Risk: In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to corporate governance risk, management malfeasance, accounting irregularities, unfavorable changes in management team or management strategy leading to corporate under-performance. Such risks can develop in an unpredictable way where corporate insiders have way more information in their custody than the public investors including the AMC. Hence such risks can only be partially mitigated by thorough research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the Fund's value may be impaired.

Drivers of Fund Performance

- 1) Mutual fund industry is still at its infancy in Bangladesh and represents approximately 2% of market capitalization and currently a significant demand for the product exists. Therefore, it is possible that demand for the "EBL AML 1st Unit Fund" units will be substantially over the supply of units.
- 2) Image of EBL Asset Management Limited as the Sponsor, ICB Capital Management Limited as the Trustee and Custodian, and their respective credibility may motivate investors to invest in this Fund.
- 3) The asset manager, EBL Asset Management Ltd, has vastly experienced and highly qualified investment management team in Bangladesh with their proven track record would attract investors to invest in this Fund.

Attributes of Prospective Investors

- 1) Individuals who do not have tolerance of bearing risk and know nothing about the functioning of the capital market should not apply for the units of the fund.
- 2) Individuals who are looking for long-term capital growth and dividend payment and are comfortable with the risk associated with equity investments should consider investing in the fund.
- 3) An individual should also consider investing in the fund if he/she can accept variability of returns, have a moderate to high tolerance for risk and is planning to invest in the fund over the medium to long-term.
- 4) Considering other factors like the investment opportunities available in the market, return expectation, income level and consumption pattern, one may put only a limited portion of his/her total portfolio into the fund.

MUTUAL FUNDS DO NOT GUARANTEE ANY PREDETERMINED RETURNS.

CHAPTER 5: INVESTMENT APPROACH AND RISK CONTROL

5.1 INVESTMENT APPROACH

A top down and bottom up approach may adopt the following investment management and risk control processes –

- i. EBLAML has formed an Investment Committee (IC) comprising of the Managing Director, Chief Investment Officer and Chief Risk and Compliance Officer for reviewing and approving investment decisions for the Fund in a well-rounded way. Research Analysts will present their independent investment research findings in the IC meeting from time to time.
- ii. The IC will thoroughly assess macro-economic and socio-political condition of the country to form risk-return expectations objectively for different asset classes in the context of prevailing market valuation level. Relative risk-return attractiveness of different asset classes as suggested by the research findings will drive asset allocation decisions for the Fund.
- iii. The IC will screen securities with qualitative filters to find the securities issued by the issuers with highest integrity from management and governance quality perspective. Background check of the key officials, assessment of long-term sustainability and competitiveness, financial reporting quality, shareholding structure, management compensation policy, credit and dividend payment history of the subject companies/issuers will be reviewed carefully.

Following is a summary of different types of assets available in Bangladesh for investment:

EQUITY: A stock or any other security representing an ownership interest is called equity. Equity investments available in Bangladesh are as follows:

- **Listed Equities:** Listed equities are those companies whose shares are traded on stock exchanges. Listed equities are more liquid in nature.
- **Pre-IPOs:** Mutual Funds can make investment in Pre-IPO companies. The purpose of such investment is to capture the capital gain potential of a company which has enormous growth opportunity ahead.
- **IPOs:** Mutual funds also has been allotted a fixed quota of 10% to invest in IPOs.

FIXED INCOME SECURITIES: A security that provides a return in the form of fixed periodic payments and eventual return of principal at maturity. Fixed Income Securities in Bangladesh are as follows:

- **Term Deposits:** Investment can be made in the form of term deposits in Banks and NBFIs.
 - **Corporate Bonds:** The bond market of Bangladesh is very thin. Currently, there are only one listed corporate bonds in Bangladesh- IBBL Mudaraba Perpetual Bond. Besides, privately issued BSEC approved different corporate bonds can be accessed by the fund under institutional arrangement.
 - **Government Securities:** Government securities includes Treasury Bills and Treasury Bonds. There are number of treasury bills available in Bangladesh for different maturities ranging from 14 days to 364 days. Treasury bonds are also available for different maturities e.g. 2 years, 5 years, 10 years, 15 years and 20 years. Government securities are risk free in nature as it is backed by government.
 - **Commercial Papers:** Reputed organizations often issue commercial paper at discounts for a stated time period generally less than a year which are then redeemed at face value at maturity.
- iv. Research Analysts of EBLAML will undertake proprietary fundamental analysis processes to determine fair value estimates for the securities under review considering their long-term business and financial performance outlook. Research Analysts will consult with corresponding management executives and industry insiders for each company under review in this process. Securities with highest upside potential will be recommended to the IC at the end of this stage.

FUNDAMENTAL ANALYSIS:

ECONOMIC ANALYSIS- Economic indicators like GDP growth, per capita income, per capita consumption etc. helps to understand the dynamics of an economy and growth potential of businesses.

INDUSTRY ANALYSIS- Industry analysis helps to understand the market share of companies, the degree of concentration and competition within the industry and growth prospects of the industry.

COMPANY ANALYSIS- Business dynamics like product demand, revenue growth, margins, net profits, dividends, debt burden, asset quality, corporate governance, management capacity etc. All these factors will be considered for a detailed analysis of a company.

Accumulating all the information and using subjective judgment based on own knowledge, analysts will forecast future earnings of a company. Finally, the most suitable valuation method will be used to find out the intrinsic value of a company which will ultimately indicate the return potential from that investment within a specified time period.

As the investment objective of EBL AML 1st Unit Fund is to offer return through capital appreciation, investment in Pre-IPO companies is very much aligned with the objective. EBL AML 1st Unit Fund will consider investing in Pre-IPO companies with a solid business model depicting an appealing growth story in future.

Investing in Pre-IPOs also comes with some risk factors in terms of discovering the appropriate value and liquidity at the time of sale. However, such companies offer easier access to management and greater availability of detailed financial information compared to the listed companies. Equipped with an efficient research team and prudent investment committee, EBLAML believes to rightly identify a potential business model and well balance the return and risk of the Funds' portfolio through such investment.

TECHNICAL ANALYSIS:

Apart from fundamental analysis, EBLAML will also rely on technical analysis to take the benefit of market momentum. Technical analysis assumes that the price of a stock is already adjusted for all the publicly available information and focuses on the analysis of supply and demand condition in the market. It involves analyzing the historical price and volume of the stock and identifying the trend of the market.

FIXED INCOME SECURITIES INVESTMENT ANALYSIS:

While selecting from fixed income securities, EBLAML will consider the following factors:

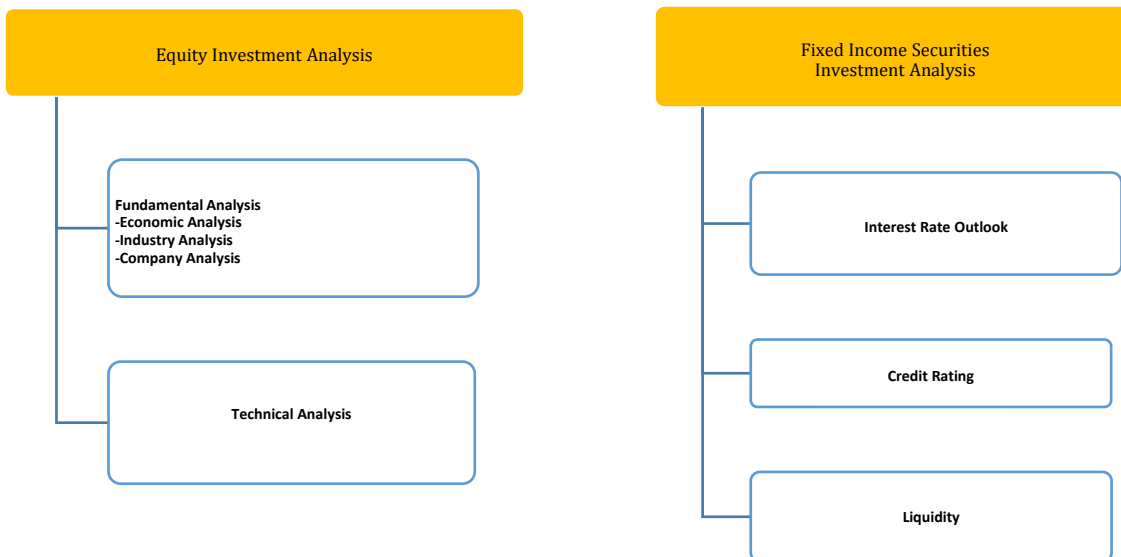

INTEREST RATE OUTLOOK: Fixed income securities are mostly vulnerable to changes in interest rates. Prices of bonds are inversely related to the interest rates i.e. price of bonds falls when interest rate increases, while the reverse happens when interest rate falls. Therefore, interest rate scenario of the country will be monitored on continuous basis.

CREDIT RATING: Credit rating indicates the ability of an organization to fulfill its financial commitments. Credit rating agencies assign ratings to companies and financial instruments depending on its capacity to meet its debt obligations. EBLAML would invest in investment grade securities which refer to high credit rating.

LIQUIDITY: Fixed income securities are available with different tenors. The longer is the maturity term, the lower is the liquidity. When investing in such securities, liquidity is an important factor to consider.

- I. The IC will review the outcome of the fundamental analysis and will construct a model portfolio by combining securities that offer highest risk-adjusted-return. The IC will also ensure adequate diversification (to different asset classes, sectors and companies) is achieved at this stage.
- II. IC will determine appropriate risk management strategy for individual securities and at the portfolio level.
- III. IC will monitor business performance of the portfolio companies/ issuers on continuous basis and will rebalance portfolio as and when needed to achieve investment objectives.

INVESTMENT PHILOSOPHY

Asset selection process

5.2 RISK CONTROL

Different investment securities like equity, debt securities or money market securities have their own risks. So, it is very important for the fund manager to understand all the associated risks with the investment securities and establish proper control mechanism to minimize those risks. EBLAML has engaged qualified investment professionals who have thorough knowledge about the downside risks of investment securities and would analyze all the publicly available data to discover the actual risk adjusted return of the securities. Apart from a well-qualified fund management team, there will be policies to check the credit risk, interest risk and liquidity risk.

GENERAL RISK FACTORS:

- I. Due to the fluctuation of the price/ value/ interest rates of the securities in which the Scheme invests, the value of investment in the Scheme may go up or down depending on the various factors and forces affecting the capital market and money market.
- II. Government policy and tax laws may change, affecting the return on investments of the fund, which may eventually affect the NAV and return of the Units.
- III. Large number of redemption requests, may lead to an asset-liability mismatch and therefore may require the investment manager to make a quick sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.
- IV. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme remain idle and no return is earned thereon. The inability of the Scheme to make intended securities purchases and sales, due to settlement problems, could cause the Scheme to miss certain investment opportunities.

SCHEME SPECIFIC RISK FACTORS:

Some of the specific risk factors related to the Scheme include, but are not limited to the following:

RISK FACTORS ASSOCIATED WITH INVESTING IN EQUITIES AND EQUITY RELATED INSTRUMENTS:

- I. As the major portion of the fund will be allotted to growth assets, the risk is also high in this case. Generally, the future growth prospect of a company depends on multiple factors, some of which are beyond the level of management capacity. So, if one or some of these factors go unfavorable, it is possible that the company may not be able to deliver the expected growth.
- II. Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis.
- III. Securities, which are not listed on the stock exchanges, are illiquid in nature and entails higher liquidity risk, in comparison to securities that are listed on the exchanges.

- IV. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges.
- V. Despite careful selection of companies for investment in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return of the Fund.

RISK FACTORS ASSOCIATED WITH INVESTING IN FIXED INCOME SECURITIES:

- I. The Net Asset Value (NAV) of the Scheme, to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates.
- II. Money market instruments lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- III. Investment in debt instruments are subject to credit risk i.e. the risk of an issuer's inability to meet interest or principal payments on its obligations, which may have their credit ratings downgraded. Changes in financial conditions of an issuer or changes in economic and political conditions specific to the issuer are factors that may affect an issuer's credit quality and security values.
- IV. Government securities have price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- V. Fixed rate bonds are subject to interest rate risk, meaning that their market prices will decrease in value when the generally prevailing interest rates rise. Since the payments are fixed, a decrease in the market price of the bond means an increase in its yield. When the market interest rate rises, the market price of bonds will fall. Therefore, the interest rate risk on debt securities also.
- VI. Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the Scheme.

RISK CONTROL MECHANISM:

As the objective of EBL AML 1st Unit Fund is to generate risk adjusted return through capital appreciation of assets, there are relatively higher risk to maximize higher return. To understand all those risks requires a great deal of analysis. Apart from that, different investment securities like equity, debt securities or money market securities have their own risks as described in above. So, it is very important for the fund manager to understand all the associated risks with the investment securities and establish proper control mechanism to minimize those risks. EBLAML has engaged qualified investment professionals who have thorough knowledge about the downside risks of investment securities and would analyze all the publicly available data to discover the actual risk adjusted return of the securities. Apart from a well-qualified fund management team, there will be policies to check the credit risk, interest risk, liquidity risk and other associated risk.

EBLAML's internal investment philosophy, which prioritizes good governance and adequate management capacity in case of investment decision, will immune the fund from investments in poorly governed investment securities.

- To minimize the downside risk of an investment, EBLAML would maintain proper margin of safety during investment.
- To mitigate the default risk of securities, EBLAML would evaluate the credit fundamentals of each investment opportunity. The AMC utilizes ratings of recognized rating agencies as an input in the credit evaluation process.
- An interest rate scenario analysis would be performed on an on-going basis based on which the Fund Manager would manage the investments of the Scheme on a dynamic basis to exploit emerging opportunities in the investment universe and manage risks at all points in time.

- Liquidity risk will be addressed by properly assessing the ease of convertibility of the asset into cash.
- To minimize the downside risk from technical trading, EBLAML will strictly follow the specified band for such investment.

CHAPTER 6: FORMATION, MANAGEMENT & ADMINISTRATION

This open-end mutual fund will strive continuously to find the best value investment opportunities in Bangladesh to drive long-term sustainable wealth for unitholders.

6.4.1 INVESTMENT MANAGEMENT PROCESS

INVESTMENT DECISION MAKING PROCESS: EBLAML has formed an Investment Committee (IC) comprising of the Chief Investment Officer, Chief Risk and Compliance Officer and Chief Executive Officer for reviewing and approving investment decisions for the Fund in a well-rounded way. Research Analysts will present their independent investment research findings in the IC meeting from time to time. Investment decisions will be made by combining top-down asset allocation strategy with bottom up security selection strategy considering risk control measures as described below-

TOP-DOWN ANALYSIS TO OPTIMIZE THE ASSET ALLOCATION MIX

- Finding the best asset class in prevailing macroeconomic and socio-political context
- Focusing mostly on key macro drivers like growth outlook, trend of financial sector liquidity and interest rates and policy changes.

BOTTOM-UP FOCUS TO FIND MOST ATTRACTIVE SECURITIES IN EACH ASSET CLASS

- Identifying securities mispricing of new information or emerging developments by maintaining the information processing edge.
- Avoiding valuation trap, maintaining buy-sell discipline in line with target fair value estimates.
- Maintaining psychological, philosophical and knowledge edge to post reasonable performance throughout market cycle.

Asset allocation process: The IC will thoroughly assess macro-economic and socio-political condition of the country to form risk-return expectations objectively for different asset classes in the context of prevailing market valuation level. Relative risk-return attractiveness of different asset classes as suggested by the research findings will drive asset allocation decisions for the Fund.

Investment research process: Research Analysts will undertake the following process for generating accurate, timely and actionable research recommendations -

- Screening to a smaller universe of stocks after initial screening:
 - Quality of governance and management (to assess how well minority shareholders' right is protected)
 - Focusing on industry leaders with strong business performance track-record
 - Strong balance sheet (cash-rich companies with low debt) with reasonable capital allocation history/ strategy for driving competitive return on investments
- Understanding fundamentals of underlying business:
 - Finding key drivers- decomposing business model and performance
 - Understanding long-term competitiveness of the underlying operation
 - Establishing cause-effect relationships among key variables
- Connect with industry insiders e.g. management, distributors, customers for different perspectives
- Estimate long-term outlook of critical variables and drive interlinked business performance indicators
- Determine fair value estimate for the subject security by applying appropriate valuation model
- Identify critical investment risks and catalysts for the subject security
- Communication research findings along with fair value estimate and risks to IC meeting

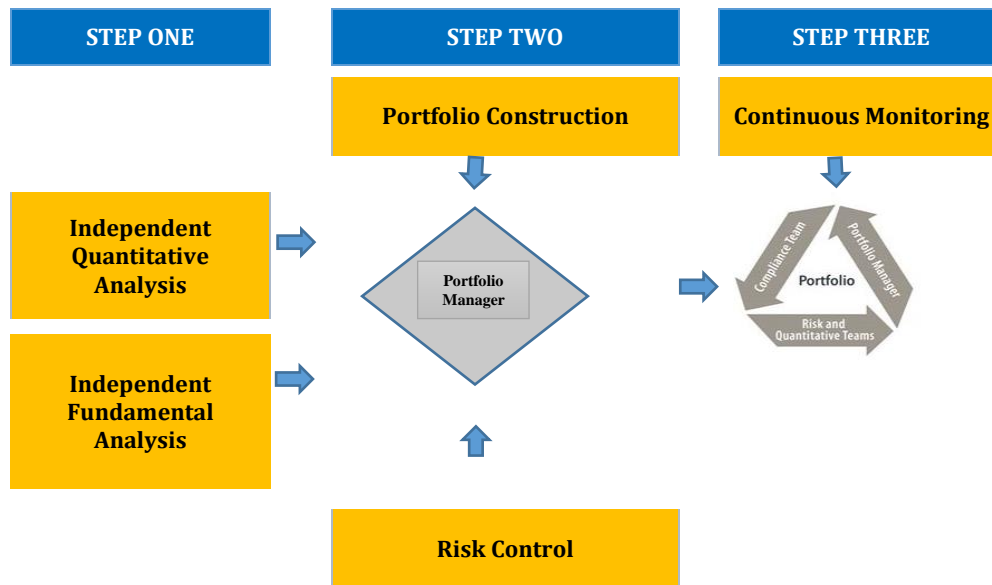

STEP ONE [SECURITY SELECTION AND PORTFOLIO CONSTRUCTION PROCESS]: The IC will review the outcome of the fundamental analysis and will construct a model portfolio by combining securities that offer highest risk-adjusted-return. The IC will also ensure adequate portfolio diversification (to different asset classes, sectors and companies) is achieved at this stage.

STEP TWO [INVESTMENT DECISION EXECUTION]: Based on the contemporary market condition and liquidity situation, IC will determine the investment execution strategy to mitigate transaction costs and optimize portfolio performance.

STEP THREE [PORTFOLIO MONITORING & RISK MANAGEMENT]: IC will monitor business performance of the portfolio companies/ issuers on continuous basis and will rebalance portfolio as and when needed to achieve investment objectives. IC will determine appropriate risk management strategy for individual securities and at the portfolio level, too.

EBLAML blend art and science, rely on independent quantitative and fundamental assessments (as well as credit analysis), and make continuous use of leading technology and sophisticated controls to maximize risk-adjusted return potential for our clients.
