Mutual fund has emerged as the effective investment vehicle for those who like to rely on professional fund manager for investment management as it has been tested over time all around the world in both developed and emerging economies. Over the past decade, mutual funds have become the investors’ vehicle of choice for long-term investing. A Mutual Fund pools the savings of a number of investors who share a common financial goal. Mutual Fund is one of the most preferred investment alternatives for the risk avert investors as it offers chance to invest in a diversified, professionally handled portfolio at low cost. With emphasis on increase in domestic savings and increase in investment through capital market, the need and scope for mutual fund operation has increased tremendously. Growth and developments of various mutual fund products has demonstrated to be one of the most important instruments in generating significant growth in Bangladesh capital market. A mutual fund invests the money in stocks, bonds, short-term money-market instruments, other securities or assets, or some combination of these investments.

Size of Mutual fund industry in Bangladesh is very small. Currently 36 closed end mutual funds & 80 Open end Mutual Funds with Asset under Management (AUM) is over Tk. 162.80 billion. The AUM of mutual funds accounts for around 2.99% of total market capitalization which is very insignificant in comparison to those of other developed markets.

Mutual funds have emerged as the best in terms of variety, flexibility, diversification, liquidity as well as tax benefits. Besides, through mutual funds investors can gain access to wide range of investment opportunities that would otherwise be unavailable to them due to limited knowledge and resources. Mutual funds have the capability to provide solutions to most investors’ needs, however, the key is to do proper selection and have a process for monitoring and controlling. In Bangladesh, the mutual fund industry is at a growing stage and it is expected to incorporate a higher number of new funds each year. For broadening the depth of the capital market, it is necessary to float more mutual funds, since these are good instruments of mobilizing savings and providing investment opportunities to small savers.

Bangladesh is expected to register significant growth and some of the sectors and companies within are likely to be beneficiary of this growth, as well. In this backdrop, this is perhaps more suitable time to invest in the leading growth potential sectors/industries of Bangladesh. The idea of mutual fund is to help transform the capital market from a speculative hub to a savings hub.

Investment in securities market always bears some risks. Investment in this Fund also involves certain risk factors. The investors should carefully consider the following risks in addition to other information contained in the Prospectus in evaluating the offer and also for taking a decision whether to invest or not:

- (01) The performance of the Fund is directly related with the macro economic situation particularly the capital market of Bangladesh.
- (02) Since the capital market of Bangladesh is highly volatile, there is no assurance of achieving the stated objective of the Fund.
- (03) Due to small number of listed securities in both the Stock Exchanges, it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so.

- (05) Limited money market instruments narrowed the opportunity of short term or temporary investments of the Fund.
- (06) Stock market trends show that price of almost all the listed securities move in unpredictable direction which may affect the value of the Fund. Moreover, there is no guarantee that the market price of units of the Fund shall fully reflect their underlying net asset values.
- (07) If the companies fail to provide expected dividend, this may affect the return of the Fund.

- (09) Uncertainties like political and social instability may affect the value of the Fund's Assets.
- (10) Government policy and tax laws may change, affecting the return on investment in Units.
- (11) Adverse effect of the economic crisis of the international community on the Capital Market of Bangladesh may affect the performance of the Fund.
- (12) Adverse natural climatic condition may hamper the performance of the Fund.

5.2 Expected Market Performance of the Fund

- (01) As the capital market index is comparatively low now, the Fund should be able to construct portfolio at a relatively cheaper cost base.
- (02) It is expected that demand of the Fund's units shall always rule over supply.
- (03) Image of ICB, being the holding company of the ICB AMCL and reputed trustee like BGIC may motivate investors to invest in this Fund.

- (04) Successful launching and subsequent satisfactory performance of 24 (Twenty Four) Mutual Funds managed by the ICB AMCL may attract the Investors to invest in this Fund.

5.3 Who to invest and how much to invest

Persons who do not have tolerance of bearing risk and know nothing about the functioning of the capital market need not apply for the units of the Fund.
